Objective

Results-driven Python Developer with 3 years of experience in designing and implementing scalable web applications using Django, REST APIs, and automation. Skilled in backend development, database optimization, and test automation, with a strong focus on improving performance and reducing manual effort. Passionate about solving complex technical challenges and enhancing system efficiency through well-structured code and innovative solutions.

Experience

- Python Developer | HCLTech (Sep 2022 – Present)** September 2022 - Present
 - Developed & automated sanity testing for Cisco IOS XR using Python & Django, reducing manual effort by 30%.
 - Designed & implemented RESTful APIs for seamless interaction with network devices.
 - Optimized SQL queries, improving data retrieval speed by 40%.
 - Integrated automated reporting tools, enabling real-time failure alerts.
 - Collaborated with cross-functional teams (QA, developers, network engineers) to enhance test automation.

Education

- Jawaharlal Nehru Technological University, Kakinada** Duration: 2018 – 2022
B.Tech

Skills

- Python – OOP, scripting, automation
- Django REST Framework – API development, authentication
- SQL & Databases – PostgreSQL, MySQL, query optimization
- HTML, CSS, JavaScript – Basic frontend integration
- REST API Development – API design, testing with Postman
- Git & CI/CD – Version control, automated deployments
- Problem Solving
- Analytical Thinking
- Communication & Reporting
- Collaboration

Projects

- ASR9K Router Sanity Test Dashboard**

Developed a Django-based web dashboard to automate sanity testing for ASR9K routers. The system collects test logs, analyzes failures, and provides real-time reports for test engineers.

Key Features:

Test Case Management: Store, categorize, and track router sanity test cases

Automated Log Analysis: Parse test logs to classify failures

Failure Tracking & Bug Reports: Raise incidents and notify teams

Dashboard with Visualizations: Charts and tables to display test trends

Email Alerts & Notifications: Automatic failure alerts via email

User Authentication & Roles: Admin, Engineer, and Viewer access

CERTIFICATIONS & ACHIEVEMENTS

- Python Programming Certification – Programming Hub | Sep 2023
- Cisco Certified Network Associate (CCNA) – Cisco | July 2023
